LB = levels below transfe **4LB** would = 4 levels below transfe
Suc 1 = Success 1 = A, B, C, CR divided by all grade notation
Suc 2 = A, B, C divided by all grade notations (CR is excluded from the calculation)
Trans = Transfer

Comments: English and ESL:

-The success rate in transfer English is lower at 62.8% than the ESL Transfer success rate at 70.9%.
 -The transfer rates of lower level English courses1 to 3 levels below transfer English range from 56.5 to 59.4 while the ESL courses 1-3 levels below transfer have success rates of 63.7 to 68.2%. The unanswered question in both these instances is "why are the ESL success rates higher?".

Comments: Math:

-While transfer math has a 60.2% success rate, the classes below have success rates that range from 48.1% in Arithmetic to 55.7% in Geometry. This should help colleges who have lower success rates in various math courses to see how other colleges are doing in these courses. In general, students in math courses across the board seem to have low success rates.

ESL Success Rates by Level Below Transfer ESL
